

## Annotation

Giorgi Datukishvili's master thesis

"Historical-geography development features of horticulture (field-husbandry)"

According to I. Javakhishvili

In our country annually imported agricultural production volume reaches hundreds of million dollars, but names includes almost all types.

Georgian agricultural traditions counts thousands of years. For modern agriculture mostly important is to foresee historical-geography features of the traditions and experiences, what effectively uses Georgian farmer. So, the most perfect description of experience is given in I. Javakhishvili works, in particular, in "Economic history of Georgia".

**Master thesis research aim is analyze** of historical-geography features of agriculture of Georgia according to the I. Javakhishvili "Economic history of Georgia".

**The thesis scientific novelty and meaning** are connected to the demonstrating of historical-geography features of agriculture of Georgia according to I. Javakhishvili "Economic history of Georgia", what was not realized up today.

Thesis **practical meaning**- to create bright image about farming fields, which were following our ascendants with success. Foresee past experience, by our opinion, is an important pre-condition of the development of modern agriculture.

Master thesis is presented in 77 computer printed pages. It consists of introduction, four chapters, and conclusion. In the **first** chapter there is discussed historical-geography features of farming of Georgia, in the **second** chapter- historical- geography features of agriculture of Georgia, in the **third** chapter- historical-geography features of field-husbandry and in the **fourth** chapter- zonal specialization historical-geography features of agriculture. Finally there are shown conclusions elaborated based on analyze. In the master thesis used literature list is presented with 34 units (in Georgian, Russian, English languages and internet material).
